Defender Front Seats

Left Hand
Defender Standard Seat

The Exmoor Trim Standard Front Seats are Built for Comfort & Durability.

>> The back foam has a protective coravin layer to ensure the metal frame does not penetrate the foam (common trim fault).

>> We use a superior cold cured high density foam. This means the foam lasts longer and retains memory and form.

>> As with all Exmoor Trim seats they are new frames and are not refurbished seats.

>> All Exmoor Trim covers have stitched fluting sewn into the cover and are not only heat welded making our covers tough.

See page 69 for swatches

Options - Seat Heater - Pneumatic Lumbar - Electric Lumbar

Seat Runners, Mechanism Covers & Handles included.

Defender Front Seats

Left Hand
Defender Seat Backs

>> Easy to fit.

>> Direct replacement for your existing seat back.

>> All our replacement Backs, Bases and Trim Kits are sewn covers. We do not heat weld our covers to create patterning on seat face.

>> Exmoor Trim's superior cold cured high density foam with a Coravin internal layer to stop the metal frame from wearing through (common trim fault).

>> All our seat frames are made by our own high precision tooling.

>> All Exmoor Trim seat backs have a top metal eyelet ready for a headrest to be fitted.

See page 69 for swatches

EX12752 - XS Black Rack

Right Hand
Defender Seat Backs

As Left Hand seat back above.

Installation

>> Easy to fit: Remove old mechanism handle & cover. Now release the circlip from the opposite side to the handle and retain. Now remove the two 13mm bolts. Your old seat back is released from your runner. Reverse this procedure to fit the new seat back.

>> New mechanism covers and handles are available. See page 9.

>> When purchasing backs and bases don't forget this is an ideal time to have a Heater Kit or Lumbar Support installed. See page 5

EX9997 - Grey Logo
EX12751 - XS Black Rack

Headrests

Cold cured foam headrest trimmed to match your interior.

Installation

>> To remove your headrest you need to release the small metal retaining clip at the end of the stalk. Push the headrest down and then pull hard upwards to release this clip. (If you are having difficulty removing the headrest) you will need to release the trim cover on the seat back and lift the cover upwards to expose the internal metal work. Push the retaining clip in to release.

See page 12.

>> With older seats they can be stubborn to remove. We recommend using a piece of wood under the headrest and hammer to force the headrest up (without damaging the headrest!).

Defender 2nd Row Seats

High and Low Backs

See page 69 for swatches

Exclusively from Exmoor Trim our High and Low Back Seats add Comfort and Style to your Second Row.

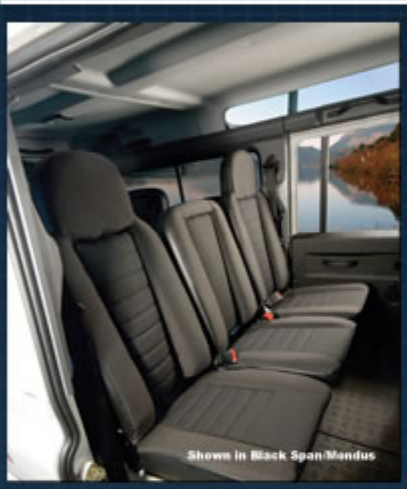
>> The Classic High Back offers the second row passenger great comfort and safety.

>> A direct replacement for your existing standard 2nd row seats.

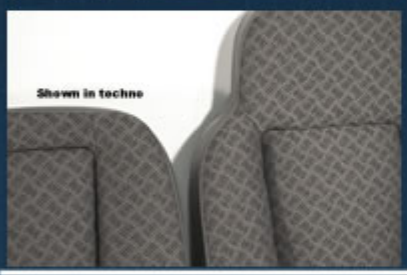
>> This seat has been impact tested and meets all EU new vehicle regulations. Has a robust internal steel frame.

>> Cannot be used with a 60/40 bench seat frame. If you have a 60/40 bench seat and would like to upgrade to our three individual High or Low Backs then you will require our 2nd row reclining kit. See below.

>> Seat back will tilt forward to full horizontal.



Shown in Black Span/Mondus



Shown in techno

>> You can install High and Low Backs in any configuration. High-Low-High, High-High-High or Low-Low-Low etc.

Installation

>> Unbolt pivot collar bolts from either side of standard seat back. Remove 2 long bolts from underside of seat base. Now remove seat back locking pin and collar and retain.

>> To install the new seat base ensure you use the two new bolts and washers supplied.

>> To install your new seat backs ensure you use the 2 new collar bolts and washers supplied. Remove vinyl from internal captive thread hole using template supplied and bolt in place.

>> Finally to lock your new High or Low Backs into place remove the vinyl for the internal locking pin on left or right only as required.

Options - Seat Heater - Pneumatic Lumbar

Supplied with all new fixings required to install into your existing base frames

2nd Row Reclining Kit

Supplied with all new fixings required to install

An Exmoor Trim reclining kit to convert your Second Row to three individually reclinable seats

Image top left shows extent of seat recline

REC2R - Second Row Reclining Kit

>> Only Exmoor Trim High or Low Back seats can be fitted to the new reclining seat frames.

>> A single reclining lever for each seat provides individual adjustment and improved legroom.

>> Optional High or Low Back configuration. See above.

>> Not compatible with 3 man bench seats in the rear load area.

>> The seats recline forwards but cannot be folded down through 2 stages (as 60/40 or Standard Second Row seats can).

>> Your old second row seats require complete removal.

>> The vehicle requires some drilling to fit the new frames.

Defender Load Area Seating

Inward Facing Tip Ups

Belt not supplied with seat

- >> Not suitable for baby or booster seats.
- >> The seat base can be quickly and easily folded up over the wheel arch when not in use.
- >> Standard lap belt or ALR Retractable Lap Belt can be used.
- >> Can be fitted to replace bench seats. Up to four can be fitted (two per side).
- >> The pivot bracket extends the full length of the seat base for strength.
- >> Not suitable for Lightweight Land Rovers.

EX4088 - Olive PVC
EX6320 - Black PVC WSW
EX4092 - Sand PVC WSW
EX4091 - Olive PVC WSW

A small amount of drilling is required to accommodate the push stud fixings. Easy release Tenax fixings are pre fitted to the hood & attach to the push stud fittings on the vehicle body.

>>90/110 Inch Truck Cab Hood

Non shrink, non fade and easily cleaned.
Only available in highest quality Mohair.
Requires a truck cab hood stick set.
Two mini 225mm lateral bars supplied.
Tinted rear window can be unzipped and rolled up.
All push stud fittings supplied.
This is a great conversion if you already have a soft top fitted. Simply bring the rear hood stick forward and locate in the holes behind the fronthood stick.
The horizontal tie bars and centre support hoop become redundant. By releasing the hood from the front screen rail, you will be able to roll the hood backwards behind you.
The rear curtain must be rolled up.

>> High Capacity Hoods

The rear body of a 130 is the same width as a 110" Hi Capacity, only shorter in length.
Tinted front & rear windows as standard.
Zip up rear curtain as standard.
Zip sides as standard. Side windows are optional.
Fits original hood sticks.
No drilling required.

Rope Hood Elastic

Rope hood elastic for PVC and Mohair hoods. This part can be used on canvas hoods though it won't stop the natural stretches and movement of canvas that a rope set will.

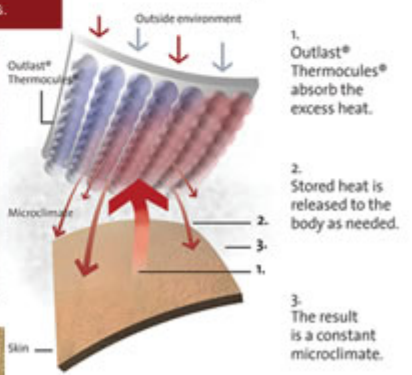
ExmoorTrim only uses fabrics, vinyl's and leather that have been wear tested and meet all automotive requirments.

How Outlast® Adaptive Comfort® works



1. Outlast® Thermocules® absorb the excess heat.

2. Stored heat is released to the body as needed.

3. The result is a constant microclimate.

Premium hooding for superior finish.

Actual colours may vary. Not all seats are available in all trims. Bespoke trim service available through your dealer.
